Notes and Sources

Notes: CPKC = Canadian Pacific Kansas City Railway. CN = Canadian National.

Train velocity measures the line-haul movement from origin to destination. The average velocity is calculated by dividing train-kilometres by total hours operated, excluding yard and local trains, passenger trains, maintenance of way trains. Weekly kilometres per hour are averaged to produce a monthly estimate.

Data and methodology have been revised at source.

Notes : CPKC= Chemin de fer Canadien Pacifique Kansas City. CN= Compagnie des chemins de fer nationaux du Canada.

La vitesse de train mesure le mouvement de transport de ligne de l'origine à la destination. La vitesse moyenne est calculée en divisant les trains-kilomètres par le total des heures d'opération en excluant les gardes de triage et les trains locaux, les trains de passagers ainsi que les trains de maintenance de la voie. Chaque semaine on calcule la moyenne des kilomètres par heure afin de produire une estimation mensuelle.

Les données et la méthodologie ont été révisées à la source.
